## (Emergency data recovery) Fast and Reliable Recovery of Microsoft Office Documents

Contributed by Webmaster

By Afonin, Oleg

What would you value most in a data recovery solution should you lose an important document? Would it be speed, convenience, or ease of use? These things surely matter for all kinds of computer software, but data recovery has one specific demand that outweighs everything else by a huge margin. This factor is reliability of the recovery.

Microsoft Office documents store results of many h....

Which Backup Solutions Are Right for You?

By Andrew Stratton

One of your company's most important assets is its electronic data. Your company stores it's financial, documentation, and correspondence documentation on its servers.

What would happen to your company if you had a fire or flood and you lost all of your valuable data? How expensive would a recovery effort be? Would your business be able to recover from such a loss, and where would you even begin the recovery process?

These are all questions which shoul....

Offsite Data Storage for Guaranteed Disaster Recovery

By Andrew Stratton

Every company today needs to have a solid disaster recovery plan. A disaster recovery plan outlines how your business will protect its electronic data, and what the process will be to restore that data, in the case of a manmade or natural disaster.

With the recent hurricanes and events of the world, such as 9/11, it is vital that all businesses be able to recover their data no matter what happens to their physical building.

In addition to large disasters, smaller disaster....

Why Use an External Backup System

By Terry Fitzroy

When it comes to backing up your data and ensuring it remains safe, you have plenty of options at your disposal. Some options are clearly better than others, and when it comes to the debate about external backups vs. internal backups, for many external wins hands down. Here's why you should use an external backup system.

Your external backup system can be done with many different devices. CD's, tape backups, key drives, and o....
