## (Cheap data recovery) Is Online Data Backup Part of Your Disaster Recovery Plan?

Contributed by Webmaster

By Andrew Stratton

Whether you have a small business or a large corporation, one of the most valuable assets of your business is its electronic data. Your business's electronic data consists of its financial information, documentation on clients and sales, and all other data stored on your computers and file servers.

Have you ever thought about what woul...

Online Data Backup Are the Next Generation of Backup Technology

By Andrew Stratton

Online data backup are quickly replacing more traditional backup technology, such as tape backups Through the technology of the Internet, online backup or web based backups are a method of storing data offsite. This data could be files, folders, or entire hard drives. This important data is regularly backed up to a remote server or computer with a network connection.

A number of third party companies provid...

Online Data Backup is a Great Option for Disaster Recovery

By Andrew Stratton

As a small business owner, have you considered what you will do if your computers or servers crash? What if your building is the victim of fire, flood, earthquake, or vandalism?

Oh, I hope you are not caught unprotected from a power surge or a brown-out in the middle of the night. And none of your employee you recently fired has....

An introduction to Computer Forensics

By Kevin Cohen

Computer Forensics is the process of investigating electronic devices or computer media for the purpose of discovering and analyzing available, deleted, or "hidden" information that may serve as useful evidence in supporting both claims and defenses of a legal matter as well as it can helpful when data have been accidentally deleted or lost due to hardware failure.

However, this is a very old technique but now it has been changed a lot because of technological advances, mo....

Offsite Data Backup is Vital for Your Business

By Andrew Stratton

Do you have a disaster recovery plan in place for your business, just in case there is a disaster and you lose all of your electronic data stored on your computers and file servers? If you do not, today is the day to sit down and start to build your plan!

While we all hope events such as the terrorist attack on the World Trade Center and the natura....
